Sub Total	
<b>Allowance for professional fees, demolition and other costs at 18%</b>	
Sub Total	
<b>Uplift by Location Factor where applicable</b>	
Total	

**Important Explanatory Notes:**

1. These figures are not appropriate for houses with special design features or that are Architecturally bespoke. Please seek specialist advice.
2. Floor area measurements must be taken to the outside perimeter of the building with additional allowances for the area of all upper storeys. As a guide, an attic upper floor can be measured at 60% of the floor area below, increasing to 90% in the case of a mansard style property.
3. These figures are general averages. Advice is always recommended from your insurers or a Chartered Surveyor, especially if your property or site is unusual, larger or smaller than average or with restricted access, if the site is significantly sloping or requires special foundations.
4. If your property is of bespoke Architect design, seek advice from your insurers or a Chartered Surveyor as higher rates may apply.
5. Listed buildings are generally covered by the appropriate part of the table but further allowances should be made if your property has particular historic features, such as shutters, ornate cornices, unusual roofs/chimneys etc. If in doubt which features are significant, please seek specialist advice.
6. The level of finish assumed is a reasonable average quality. If your property is finished to a particularly high standard or has non-standard design features then figures should be increased.
7. Rates make allowance for normal building services installations, including central heating. Further allowances should be made for renewable energy systems such as heat pumps or solar systems.
8. Separate advice should be taken from your insurer or a Chartered Surveyor in respect of properties with basements, substantial outbuildings or leisure facilities.
9. If your property has a particularly long drive or is some distance from a main road, additional allowance should be made for services such as water, gas, electricity and drainage.
